- Inhouse-server solution	no	upon request / expense	upon request / expense	upon request / expense	upon request / expense

1) The module "BASIC" depends on the number of users in the crisis team. Members of the crisis team can initiate, edit and end alarms as well as administrate the system - depending on the user role. The module "BASIC" does not include the user roles "Employee" and "Guest". Connecting the fire alarm system to EVALARM is not included in the price.

2) The module "COM PLUS" includes the user roles "Employee" and "Guest" which can create and receive alarms - but not edit them. Only crisis team members can edit alarms.

The price of the package "COM PLUS" depends on the estimated number of "Employees" and "Guests". The module BASIC will be assumed.

3) The module "Dead Man's Switch & SOS" assumes the two modules BASIC and COM PLUS. The price depends on the number of users who can use this feature.

4) The module "Evacuation" assumes the module COM PLUS. The price depends on the number of users who can use this feature.

5) The NFC functionality is only available on Android based phones because iOS does not support it at the moment.

6) The use of the Tablet Version will be priced according to the number of external units. The module COM PLUS will be assumed.

7) The one-time connection fee includes setting up the customer location as well as the customer accounts according to the signed offer. Workshops, training sessions as well as configuration and connection of the technical interfaces will be billed according to the daily rate of the service personal or not recorded as valid in each case.

parties regarded as valid in each case.

8) Connecting and implementing the fire alarm system is independent of the package / is possible for each package. Connecting the fire alarm system will be handled by a technician at the location. The costs for the configuration in the backend for each fire alarm system will be determined case based.

EVALARM is offered as a cloud service solution. It is possible to use EVALARM as an Inhouse-solution. Prices depend on request / operating expenses.
