1. EVALARM Cockpit

The EVALARM cockpit serves as a central **control station** for dealing with the different alert scenarios.

You can **create alarms,** overlook **active alarms** and see past alarms in the **alarm archive**.

You can also administrate your EVALARM location here, if you have the appropriate administrator rights.

You can log in with your access under **web.evalarm.de**.

The following user roles have access to the cockpit:

- **Administrators**
- **Emergency & Crisis team supervisors**
- **Emergency & Crisis team members**

The cockpit is divided into **5 sections** for better organization:

1. **Cockpit**
2. Visitors (if module is activated=
3. **Alarms** (creating and receiving)
4. Alarm Archive
5. Documents
