

2.1 App-Menu

After you have logged into EVALARM, the **Home Screen** opens.

From here, you can control all the features of the app.

The app-menu can be reached via the button in the left upper corner.

There you can find following sections:

1. **Your profile**
2. **Settings**
3. **Connection status**
4. **App permissions**
5. **Imprint**
6. **Terms of Use**

You can switch between sections by swiping.

If specific modules (like the visitors management, checkpoint management or the RFID-client) were assigned to you via the [access rights](#), you can find them here in the menu too.
