

15. Documentation and Evaluation

All **changes in the system** and **alarm activities** are in auditable logs in EVALARM so that the greatest transparency always exists.

You can find the logs in the web console administration and limit them to a specific period for a better overview.

The corresponding logs are available as an **Excel download**.

Alarm Activity

Under alarm activity you can see all actions (alert creation, escalation, additional information, ...), which are recorded in the event of an alert. These logs can be exported and evaluated in the follow-up.

In the protocol you can see who has started, received, accepted or rejected, updated or ended an alert.

The content of the updates also get logged in detail.

STRUCTURE CHANGES

Please, select a required time period to [create an alarm delivery log](#). The current available file will be replaced.

You can [download an alarm delivery log](#) which was requested at 25.06.2020 17:35.

Alarm	Details	Status	Content
Fire	John Smith 25.06.2020 17:31	Push (Android)	Sent
Fire	EVALARM System 25.06.2020 17:31	Alarm Processing	
Fire	EVALARM System 25.06.2020 17:31	Alarm Processing	
Fire	James Williams 25.06.2020 17:31	Push (Apple)	Sent
Fire	Admin Groupwork 25.06.2020 17:31	Push (Browser)	Sent
Fire	Admin Groupwork 25.06.2020 17:31	Alarm Ended	end
Fire	James Williams 25.06.2020 17:31	Push (Apple)	Sent

[illegible]

Structure Changes

You can thus track every system change and which user has made changes in the configuration.

This allows you to quickly locate and fix bugs.
